Homeowners know meeting these requirements is not too much to ask. And, if you ask professional contractors from around the country for their recommendation, many would choose Norandex branded vinyl siding products. That’s because Norandex Vinyl Siding offers homeowners preferred choices in styling and performance.

Because of the varying weather patterns throughout the states, Norandex offers both insulated and uninsulated vinyl siding. Products that won’t fade when exposed to sunshine, that help insulate a home from winter’s chills, and will stay on the wall in areas prone to extremely high winds.

An assortment of truly distinctive profiles in combination with a wide array of beautiful colors, enables homeowners to create that perfect exterior finish they’ve always dreamed about. The availability of solid vinyl soffit and accessories not only help accentuate the home, they are also low maintenance products complementing the siding selection.

And, all Norandex Vinyl Siding products carry one of the strongest homeowner warranty packages available in the industry…A Limited Lifetime Transferable Warranty with ColorHold® Lifetime Fade Protection.

Norandex Siding is proudly made in the U.S.A. to the highest American quality standards by trained and skilled professionals.

Norandex Vinyl and insulated Vinyl Siding certified through VSI’s Program are verified by a third-party, accredited inspection agency to meet or exceed the long-standing, accepted ASTM industry standards for quality. Colors that have been certified through VSI’s Program must meet or exceed ASTM color retention requirements. Consult the VSI website at www.VinylSiding.org for a current list of certified products and colors.

Incorporate Norandex Brand products into your plans quickly and easily by downloading our design files from CADdetail.com.
Endless design possibilities with the many shapes of Home Accents.

- Can be used in entire home applications or as a finishing touch in a gable or dormer
- Defined, natural woodgrain pattern
- Easy interlock between shapes means Home Accents® can be used separately or mixed
- Available in six styles
- Same installation technique as siding with a full length nailing hem
- Can be installed any time of the year
- Random design and hidden seams mean even small pieces are usable, resulting in up to 67% less scrap
- Weathered colors feature variegated tones in the woodgrain, darker hues in the deep grooves and lighter shades on peaks and higher points, giving a naturally-weathered look
- Matching and contrasting soffit and accessories
- Limited Lifetime Transferable Warranty with ColorHold® Lifetime Fade Protection

Great Barrier
PREMIUM VINYL SIDING

XLok® Technology combines JawsLock®, a Superior Full Reversed Rolled-Over Nail Hem that doubles the thickness of the panel where it’s nailed to the wall, and the Norandex proprietary NailRIGHT® Siding Installation System, for an installation that’s secure and accurate.

- 0.046” Panel thickness with a low gloss natural cedar woodgrain pattern
- Wind load, test pressure 80 psf, 240 mph*
- 3/4” Panel projection
- Available in two styles:
  - Double 4” Clapboard
  - Double 5” Dutchlap
- Extended 16.66’ lengths available
- Matching and contrasting soffit and accessories
- Limited Lifetime Transferable Warranty with ColorHold® Lifetime Fade Protection

The JawsLock locking system has been engineered for faster, straighter installations. Combining a 3/4” panel projection and a curled return leg and an extra heavy duty top-lock.

Add Soffit. Add Value.

Remind homeowners of the significant benefits of adding Norandex Premium Vinyl Soffit to their home. Porch ceilings and areas under overhangs can be difficult and dangerous to maintain. Norandex low-maintenance vinyl soffit is weather resistant so there’s never a need to scrape, sand and paint again, saving time and money on periodic upkeep.

A selection of truly distinctive profiles gives homeowners the option of choosing a soffit panel that best accentuates their exterior finish, including an extra thick Double 5” profile that can be used for vertical applications.

To complement their siding selection, Norandex Vinyl Soffit comes in a variety of beautiful homeowner preferred colors. The soffit can be perfectly matched to the siding for a unified look, or contrasted to add a subtle, appealing highlight.

With weather-resistant Norandex Vinyl Soffit, there’s virtually no maintenance ever. This means homeowners can use the extra time and money they save to do the things they truly enjoy.

Proper attic ventilation is not something that should be overlooked. Excessive moisture build-up can lead to mold and mildew growth, and cause potential damage to a home’s wood framing. That’s why many homeowners are making the smart choice to have Norandex Premium Vinyl Soffit installed under their overhangs.

Choose from these ventilation system options:
- Perforated Center Vent
- Perforated Full Vent
- Lanced Full Vent
- Hidden Ridge® features venting slots hidden deep in the U-grooves of the soffit panels. This provides efficient airflow for proper ventilation while maintaining the clean look of solid soffit, and helps reduce heating and cooling costs by helping maintain a more energy-efficient attic temperature.

Proper attic ventilation is not something that should be overlooked. Excessive moisture build-up can lead to mold and mildew growth, and cause potential damage to a home’s wood framing. It's not how you start a project that matters most, it's how you finish it. That's why Norandex offers a collection of decorative accent pieces appropriately named Finish Works.

Advance beyond ordinary by finishing out areas around windows, doors and gables with distinctive trim pieces designed to beautifully complement a home's new or existing cladding.

There's window and door headers, door surrounds, dentil trim, shutters, gable vents or mount blocks all made of color-through vinyl that's virtually maintenance-free. And, they are all designed with the contractor in mind for an efficient installation and a cleaner, more attractive finished look.

The flexibility of the Finish Works Wide Corner/Window and Door Surround System allows you to put your unique signature on the complete exterior design.

Use 3-1/2" Flat or Fluted Lineals, and Beaded or Cove Inserts, to create the look you prefer in a wide, 3-piece outside corner. To emphasize detail, use all elements in a color which contrasts the vinyl siding color, or match the siding color for a unified look that stresses harmony. Choose a separate color Insert to really add a mark of distinction.

For an even wider corner, use 5-1/2" Flat Lineals (available in white only), or the One-Piece 6" Fluted Corner, to create a dramatic look rivaling 1 x 6 wood construction.

You can also use Finish Works Flat or Fluted Lineals around window and door openings to create attractive wide casings.

Norandex offers a variety of exterior products for the home giving builders and remodelers almost limitless design options. Vinyl siding, soffit and trim pieces, in colors ranging from subtle to bold, to create a finish that’s unique and appealing. And, windows, doors and numerous other products that add beauty, dimension and enhancement to a home.

The best way to make a lasting impression is to use products that are designed, manufactured and warranted for a lifetime. That’s why many of the leading professionals in the building products industry choose Norandex products.

Everything You Need to Make a Lasting Impression

You believe, and we agree, there’s no such thing as an “ordinary” job.

Every home you build or remodel presents its own unique challenges, and an opportunity to show off your workmanship. You choose products for the exterior of a home that not only perform to the highest standards, but help make a home stand out.

All products also meet or exceed the color retention requirements of ASTM D-6864. Products will resist major color changes in a variety of climates, based on two-year outdoor weathering studies. Where not defined in ASTM D-3679 and D-6864, our products also meet the stringent quality controls standards of Norandex.
In addition to siding, we offer other top quality products to beautify and protect a home from the top down. Whether it’s roofing, entry doors, energy-efficient windows, decorative shapes, soffit, trim, or decking components, you can rest comfortably knowing you’ve finished your project with performance products that are among the best the industry has to offer.
