FULL LINE OF
VINYL SIDING, SOFFIT & ACCESSORIES

WWW.NORANDEX.COM
FROM OUR POINT OF VIEW

Homeowners have numerous cladding choices when it comes to finishing the exterior of their home.

They often rely on the expertise of their new construction or remodeling contractor for recommendations on the best materials to use. Consumers want a finish that makes their home stand out in the neighborhood, but also one that will stand up under extreme weather conditions. They want peace of mind knowing the exterior will retain its beauty years down the road, with virtually no maintenance, and is strongly warranted for customer satisfaction.

Homeowners know meeting these requirements is not too much to ask. And, if you ask professional contractors from around the country for their recommendation, many would choose Norandex brand vinyl siding products. That’s because Norandex Vinyl Siding offers homeowner preferred choices in styling and performance.

Because of the varying weather patterns throughout the states, Norandex offers both insulated and uninsulated vinyl siding. Products that won’t fade when exposed to sunshine, that help insulate a home from winter’s chills, and will stay on the wall in areas prone to extremely high winds.

An assortment of truly distinctive profiles in combination with a wide array of beautiful colors, enables homeowners to create that perfect exterior finish they’ve always dreamed about. The availability of solid vinyl soffit and accessories not only help accentuate the home, they are also low maintenance products complementing the siding selection.

And, all Norandex Vinyl Siding products carry one of the strongest homeowner warranty packages available in the industry. A Limited Lifetime Transferrable Warranty with ColorHold® Lifetime Fade Protection.

Norandex Vinyl Siding colors feature a tough surface based on engineered polymer compounds that resist fading. Specify the most brilliant and rich hues with absolute confidence.

For areas prone to adverse weather conditions, Norandex offers vinyl siding engineered for excellent wind load performance, that’s been tested to withstand hurricane force winds.

Norandex Vinyl Siding is proudly made in the U.S.A. to the highest American quality standards by trained and skilled professionals.

Norandex Vinyl Siding certified through VSI’s Program are verified by a third-party, accredited inspection agency to meet or exceed the long-standing, accepted ASTM industry standards for quality. Colors that have been certified through VSI’s Program must meet or exceed ASTM color retention requirements. Consult the VSI website at www.VinylSiding.org for a current list of certified products and colors.
Available in three styles:

- **9” Hand-Split Shake**
  - 100” panel thickness
  - Deep cedar woodgrain texture
  - 6’-2” Extended length panel
  - Reinforced nailing hem
  - Matching Outside Corner Post

- **7” Traditional Shake**
  - .085” panel thickness
  - Deep cedar woodgrain texture
  - 6’-8” Extended length panel
  - Reinforced nailing hem
  - Matching Outside Corner Post

- **5” Double-course Cape Cod Shingle**
  - .075” panel thickness
  - Uniform cedar woodgrain texture
  - Durable polymer construction for strength and durability
  - Variable, self-aligning nail slots for a straight, secure installation and proper adherence to the wall for weather related expansion and contraction
  - Self-concealing side tabs, with no visible overlaps, for a natural looking finish, with a temperature chart to optimize installation in any weather
  - Realistic-looking cedar woodgrain appearance
  - 9/16” Panel projection provides rigidity and casts deep, appealing shadow lines
  - Matching and contrasting soffit and accessories
  - Limited Lifetime Transferable Warranty
  - Won’t blister, crack, flake, peel or rot like wood exteriors

**Xtra Benefits**

1. Continuous Panel Lock
2. Self-Aligning Nail Slots
3. Temperature Chart
4. Self-Concealing Side Tabs

Product specifications on page 35 do not reflect Rustic Hill specs. A Certificate of Conformance is available upon request.

Colors are mechanically reproduced. For color accuracy, please see actual product sample.
STAGGERED SHAKE
• Available in three styles
  - Staggered Shake -
    • Dramatic cedar grain detail, uneven patterns, rough-sawn edges, and varied widths create richness
    • Profile has a 7” exposure
  - Split Shake -
    • Random grains and grooves for hand-split cedar’s allure
    • Deeply textured for contrast between shadow and light
    • Profile has a 7” exposure
  - Perfection Shingle -
    • Clean lines and deep textures create the perfect balance
    • Random widths and highlighted grains add tradition
    • Profile has a 7” exposure
• Can be used in entire home applications or as a finishing touch in a gable or dormer
• Easy interlock between shapes means Home Accents® can be used separately or mixed
• Same installation technique as siding with a full length nailing hem
• Can be installed any time of the year
• Random design and hidden seams mean even small pieces are usable, resulting in up to 67% less scrap
• Matching and contrasting soffit and accessories
• Limited Lifetime Transferable Warranty with ColorHold® Lifetime Fade Protection

Colors are mechanically reproduced. For color accuracy, please see actual product sample.

THE TEST PRESSURES LISTED ON NORANDEX VINYL SIDING ARE DERIVED FROM BUILDING INSPECTOR FOR WIND LOAD REQUIREMENTS IN YOUR AREA AND FOR THE ARE CALCULATED UNDER ONE SET OF CONDITIONS. PLEASE CHECK WITH YOUR LOCAL TESTING PER ASTM D-5206 WITH NAILS 16" ON CENTER. THE REPORTED WIND SPEEDS OVER time, the Seams on to Support the Siding. Excellent Support to the Polar Wall Plus! exterior System, laminated Foam Provides

.046" Panel thickness with a low glass natural cedarwood grain pattern
Available in three styles:
- Double 4" Clapboard, 3/4" panel projection
- Double 5" Dutchlap, 3/4" panel projection
- Double 6" Clapboard, 5/8" panel projection
Wind load, test pressure 54 psf, 193 mph*
Xlok® Technology combines the BearHug® Lock, a Superior Full Reversed Rolled-Over Nail Hem that doubles the thickness of the panel where it's nailed to the wall, and the Norandex proprietary NailRight® Siding Installation System for an installation that's secure and accurate
Thick insulating foam helps reduce energy loss through walls and studs, repel insects, reduce sound transmission and is a permeable
Watching and contrasting soffit and accessories
Limited Lifetime Transferable Warranty with ColorHold® Lifetime Fade Protection

BEARHUG® LOCK
The BearHug locking system includes a rolled-over double nail hem and 3/4" panel projection! For excellent wind load resistance.
.3/4" panel projection available on 20 panel

ACCESSORIES THAT ENHANCE THE BENEFITS OF THE POLAR WALL PLUS! INSULATED SIDING SYSTEM

6" Outside Corner Post
3 3/4" Outside Corner Post
These accessories are available with foam for added rigidity and under efficiency

21 HOMEOWNER PREFERRED COLORS

ADDITIONAL WARRANTY COVERAGE ON FOAM
Structural formation integrity and thermal performance of Polar Wall Plus! Insulated foam is warranted for twenty (20) years.

FOAM SPECIFICATIONS
- Density: Nominal 1.0 pound per cubic foot (Test method ASTM C-303)
- Flammability: Polar Wall Plus! Insulated foam is fabricated using modified expandable polyisotene, treated with a fire retardant chemical, and will not support combustion. Although "Modified EPS" contains a flame-retardant agent, it is an organic material and should therefore be considered flammable if exposed to an open flame or ignition source.
- Water Permeability: Not less than 5.0 poy/mil maximum (Test method ASTM E-96).
- Polyisotene laminates and is not a vapor barrier.
- Water Absorption: Less than 4.0% by volume (Test method ASTM C-272).
- CAPSULE: None

PHYSICAL DATA
POLYSTYRENE THICKNESS (THINNOMINAL)
- Double 4" Clapboard 1-1/8" 2.42 R-Value
- Double 5" Dutchlap 1-1/8" 2.42 R-Value
- Double 6" Clapboard 1-1/4" 2.42 R-Value

LONG-TERM THERMAL PERFORMANCE
"R-Value"
- Double 4" Clapboard 3.34
- Double 5" Dutchlap 3.47
- Double 6" Clapboard 3.49

The "R" Value of all profiles in the Polar Wall Plus! Exterior System exceeds the ASTM D7794 standard specifications for insulated siding established by the Vinyl Siding Institute. A product's "R" Value is a measure of the thermal resistance. The higher the "R" Value, the better the insulation's effectiveness.

THERMAL EXPANSION
Expanded polyisotene is highly compatible with vinyl siding due to their nearly identical coefficients of expansion and contraction. Coefficient of thermal expansion is .000031 in./in./degreeF .

PHYSICAL DATA
- Nominal 1.0 pound per cubic foot
- Water Permeability: Not less than 5.0 poy/mil maximum (Test method ASTM D-1363)
- Coefficient of thermal expansion is .000035 in./in./degreeF .

POSSIBLE APPLICATIONS
The Polar Wall Plus! Exterior System is environmentally friendly and easily recyclable. They are constructed from inert organic materials and contain no (CFC’s, HCFCA) or formaldehyde.

SAFE TO USE
The Polar Wall Plus! Exterior System is environmentally friendly and fully recyclable. They are constructed from inert organic materials and contain no (CFC’s, HCFCA) or formaldehyde.

- **.052" Panel thickness** with a cedar grain pattern
- **1/2" Panel projection**
- **Wind load, test pressure 30 psf, 150 mph**
- **A vertical panel for whole house or accent applications**
- The wide flat board is accentuated with a narrow batten, replicating an early American look
- **Matching and contrasting soffit and accessories**
- **Limited Lifetime Transferable Warranty with ColorHold® Lifetime Fade Protection**

The .052" thick panel combined with a heavy duty lock ensure a secure installation.

Can be used in whole house applications, or as an accent.
**Double 5" Dutchlap**
- .044" Panel thickness with a natural cedar embossed woodgrain pattern
- A 5/8" panel projection provides rigidity and casts deep, appealing shadow lines
- Available in three styles:
  - Double 4" & 5" Clapboard
  - Double 5" Dutchlap
- Wind load, test pressure 70.9 psf, 222 mph*
- Xtend® Technology combines the TitanBar® Reinforced Nail Hem and the NailRIGHT® Siding Installation System, two innovations that help ensure the siding is securely interlocked and properly affixed to the wall
- Matching and contrasting soffit and accessories
- Limited Lifetime Transferable Warranty with ColorHold® Lifetime Fade Protection

**Double 4" Clapboard**

**Add Soffit. Add Value.**

Remind homeowners of the significant benefits of adding Norandex Premium Vinyl Soffit to their home. Porch ceilings and areas under overhangs can be difficult and dangerous to maintain. Norandex low-maintenance vinyl soffit is weather resistant so there’s never a need to scrape, sand and paint again, saving time and money on periodic upkeep.

A selection of truly distinctive profiles gives homeowners the option of choosing a soffit panel that best accentuates their exterior finish, including an extra thick Double 5” profile that can be used for vertical applications.

To complement their siding selection, Norandex Vinyl Soffit comes in a variety of beautiful homeowner preferred colors. The soffit can be perfectly matched to the siding for a unified look, or contrasted to add a subtle, appealing highlight.

With weather-resistant Norandex Vinyl Soffit, there’s virtually no maintenance ever. This means homeowners can use the extra time and money they save to do the things they truly enjoy.

**Proper attic ventilation is not something that should be overlooked. Excessive moisture build-up can lead to mold and mildew growth, and cause potential damage to a home’s wood framing. That’s why many homeowners are making the smart choice to have Norandex Premium Vinyl Soffit installed under their overhangs.**

Choose from these ventilation system options:
- Perforated Center Vent
- Perforated Full Vent
- Lanced Full Vent

Hidden Ridge® features venting slots hidden deep in the U-grooves of the soffit panels. This provides efficient airflow for proper ventilation while maintaining the clean look of solid soffit, and helps reduce heating and cooling costs by helping maintain a more energy-efficient attic temperature.

**Profile & Color Shown: Solid, White**

- **.040” Panel thickness** with a low gloss brushed pattern
- **Available solid and center vent styles**
- **Center vent ventilation specifications:**
  - Net free ventilation area per linear foot - 2.0 sq. in.
  - Percentage of ventilated surface area per linear foot - 2.1%
- **3/8” Panel projection**
- **Solid panels can be used on porch ceilings as shown above to beautifully finish the exterior of a home.**

*Not available in Center Vent profile. See color availability matrix on page 32.*

- .048” Panel thickness with a natural cedar grain pattern
- Available solid, full vent lanced or with the Hidden Ridge® ventilation system
- Wind load, test pressure 46 psf, 138 mph
- Net free ventilation area per linear foot:
  - Hidden Ridge®: 1.9 sq. in.
  - Full vent lanced: 11.9 sq. in.
- Percentage of ventilated surface area per linear foot:
  - Hidden Ridge®: 1.60%
  - Full vent lanced: 9.92%
- 3/4” Panel projection
- Solid panels can be used in sidewall applications as vertical siding
- Limited Lifetime Transferable Warranty with ColorHold® Lifetime Fade Protection

The .048” thickness combined with the 3/4” panel projection creates a tight secure seal between panels and is designed to withstand extreme weather conditions. It promotes better ventilation, making it ideal for long-span applications such as vertical siding and cornices.

D5 Select cannot be used in vertical applications.

- 12' 6" long
- 24 pcs. per ctn.
- 300 linear ft. per ctn.

Starter Strip (for foam wall/plus)
- 12' 6" long
- 24 pcs. per ctn.
- 300 linear ft. per ctn.

3/4" & 3/4" F Channel
- 12' 6" long
- 24 pcs. per ctn.
- 300 linear ft. per ctn.

Drift Cap
- 12" long
- 40 pcs. per ctn.
- 480 linear ft. per ctn.

F Channel
- 12' 6" long
- 20 pcs. per ctn.
- 250 linear ft. per ctn.

Wide Corner/Window and Door Surround Systems

Dual Utility Trim
- 12' 6" long
- 12 pcs. per ctn.
- 150 linear ft. per ctn.

45° Bay Outside Corner Post
- 10 long
- 5/4" receiving pocket
- 10 pcs. per ctn.
- 100 linear ft. per ctn.

3/8", 1/2", 5/8" & 3/4" J Channel
- 12' 6" long
- 40 pcs. per ctn.
- 500 linear ft. per ctn.

3-1/2" Outside Corner Post with Foam
- 12' 6" long
- 1-1/4" receiving pocket
- 10 pcs. per ctn.
- 120 linear ft. per ctn.

1/2" F Channel
- 12' 6" long
- 24 pcs. per ctn.
- 300 linear ft. per ctn.

J Channel
- 12' 6" long
- 3/4" flexible
- 12 pcs. per ctn.
- 120 linear ft. per ctn.

3-1/2" Flat Lineal/Surround
- 10' long
- 10 pcs. per ctn.
- 100 linear ft. per ctn.

3/4" Flexible J Channel
- 12' 6" long
- 20 pcs. per ctn.
- 250 linear ft. per ctn.

3/8" F Channel
- 12' 6" long
- 24 pcs. per ctn.
- 300 linear ft. per ctn.

3-1/2" Outside Corner Post
- 12' 6" long
- 10 pcs. per ctn.
- 100 linear ft. per ctn.

200 linear ft. per ctn.

6" Fluted Outside Corner Post with Foam
- 20' long
- 3/4" receiving pocket
- 4 pcs. per ctn.
- 80 linear ft. per ctn.

Corner Insert
- 20' long
- 10 pcs. per ctn.
- 200 linear ft. per ctn.

SAFE SECURE INSTALLATION

Your professional installation crew takes every possible precaution to make sure your new siding looks and performs its best.

They use the Norandex proprietary NailRIGHT® Siding Installation System to help them locate and precisely nail into the framing studs. This is a very important detail because misapplied nails can cause siding to buckle, blow off in windy conditions, or be hazardous if they strike wiring or plumbing located between the studs.

NailRIGHT helps ensure an accurate and safe installation. It securely connects the siding to the wall for optimum performance. This means the beautiful siding you select will not only stand out, but will stay up, even in extreme weather conditions.

Beauty and Performance. It’s the perfect siding combination to make the exterior of any home...perfect.

Avoid:

Nails that miss their mark can be potentially hazardous to items, like wiring and plumbing, located in the cavities between studs.

NailRIGHT helps guide the installer to the studs for an installation that’s strong, secure and resistant to blow offs.

NailRIGHT assures the proper amount of nails are used, saving your home from unnecessary hammer hits.

THE "X" APPEARS EVERY 8" ON THE NAILING HEM AS A GUIDE TO HELP DETERMINE LOCATION OF HIDDEN WALL STUDS.

PRODUCT SPECIFICATIONS

All products also meet or exceed the color retention requirements of ASTM D-7856. Products will resist major color changes in a variety of climates, based on two-year outdoor weathering studies. Where not defined in ASTM D-3679 and D-7856, our products also meet the stringent quality controls standards of Norandex.

Product Test Data

<table>
<thead>
<tr>
<th>Characteristic</th>
<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Impact Resistance Mean Failure Energy</td>
<td>&gt;60 in. lb.</td>
</tr>
<tr>
<td>Surface Distortion</td>
<td>None at 120°F</td>
</tr>
<tr>
<td>Length/Within - 1/4&quot; of specification</td>
<td></td>
</tr>
<tr>
<td>Wane/Camber</td>
<td>&lt;1/8&quot;</td>

<td>Coefficient of Linear Expansion (in/in/ºF)</td>
<td>&lt;4.5 x 10⁻⁵</td>
</tr>
</tbody>
</table>

Fire Resistance

All vinyl siding, soffit and accessories listed in this catalog have a Class A flame spread classification per 2012 IBC.

ASTM E-84:

<table>
<thead>
<tr>
<th>Flame Spread Index</th>
<th>≤ 25</th>
</tr>
</thead>
<tbody>
<tr>
<td>Smoke Developed Index</td>
<td>≥450</td>
</tr>
<tr>
<td>Fuel Contribution</td>
<td>0</td>
</tr>
</tbody>
</table>

For more information, obtain a brochure on the fire properties of siding by contacting the Vinyl Siding Institute at www.vinylsiding.org.

Relevant Codes and Regulations Compliance

ASTM D-3679, ASTM D-7856, ASTM D-4477, ASTM D-7793

Florida Building Code Approval FL-12500, FL-12505

Texas Department of Insurance EC-75

Code Compliance Research Report #0184

†Not all products listed on this page comply with these codes, please see individual Certificates of Conformance for actual product specifications.
COMPLEMENT YOUR NEW SIDING WITH OTHER QUALITY EXTERIOR PRODUCTS

Your home deserves the best. That’s why, in addition to siding, we offer other top quality products to beautify and protect your home. Whether it’s entry doors, energy-efficient windows, soffit, trim, or metals, you can rest comfortably knowing you’ve finished your home with performance products that are among the best the industry has to offer.
