**NailRIGHT™**  
SIDING INSTALLATION SYSTEM

The “X” appears every 8" on the nailing hem as a guide to help determine location of hidden wall studs.

Your professional installation crew takes every possible precaution to make sure your new siding looks and performs its best.

They use the Norandex proprietary NailRIGHT™ Siding Installation System to help them locate and precisely nail into the framing studs. This is a very important detail because misapplied nails can cause siding to buckle, blow off in windy conditions, or be hazardous if they strike wiring or plumbing located between the studs.

NailRIGHT helps ensure an accurate and safe installation. It securely connects the siding to the wall for optimum performance. This means the beautiful siding you select will not only stand out, but will stay up, even in extreme weather conditions.

**AVOID:**

**Hidden Dangers**

Nails that miss their mark can be potentially hazardous to items, like wiring and plumbing, located in the cavities between studs.

**Blow Off**

NailRIGHT helps guide the installer to the studs for an installation that's strong and secure, resisting blow offs.

**Unnecessary Nail Usage**

NailRIGHT assures the proper amount of nails are used, saving your home from unnecessary hammer hits.
